

Waterworks

The Stables Contemporary Gallery / Mike Staniford catalogue

“My paintings in the Waterworks exhibition are a response to the ever changing idea of reflection and seek to capture the impermanence of light on water. Those fleeting moments where water acts as a mirror, enticing the senses and momentarily describing a time and a location; the interplay of land with tide as the sea seeks to reclaim its place, the thrown back drama of a setting sun, gone within a matter of moments, water acting as a painted surface.

The trick is to connect with what I see before it disappears.”
